SUMMARY

Computer Science graduate with hands-on experience in software development, web application development, and database management through internships, academic projects, and hackathons. Experienced in collaborating with development teams, building secure systems, and developing scalable applications. Passionate about problem-solving, continuous learning, and contributing to innovative technology solutions.

TECHNICAL SKILLS

Web Development: HTML, CSS, JavaScript, Basic Node.js

Databases: MySQL, SQL Queries

Tools: Git, GitHub, Visual Studio Code, XAMPP, Node.js

EXPERIENCE

Makerspace Innovhub OPC

Mapandan, Pangasinan

Software Development Intern

May 2025 – Jul 2025

- Collaborated with developers in building and maintaining web-based software solutions
- Assisted in frontend and backend development for real-world applications
- Contributed to the development of a secure tax-administration portal prototype with authentication and document-upload functionality
- Gained exposure to software development workflows, teamwork, and version control practices

PROJECTS

[QuizQuest](#) | Educational RPG Game | Thesis

San Carlos City, Pangasinan

May 2026

- Developed a turn-based RPG using GDscript, designed to gamify the learning experience for students.
- Implemented complex game logic including global state management, XP/reward systems, and dynamic signal handling to ensure seamless transitions between quiz modules and combat encounters.

[BIR Tax Administration Prototype](#)

Mapandan, Pangasinan

May 2025

- Developed QR code payment verification functionality for secure transaction validation
- Designed and managed database structures for efficient tax record storage and retrieval using MySQL
- Created responsive and user-friendly interfaces for taxpayers using modern web technologies

EDUCATION

Virgen Milagrosa University Foundation, Inc.

San Carlos City, Pangasinan

B.S. in Computer Science

Graduated May 2026
